Experience

2016 – PRESENT

Freelancer

Deliver high quality solutions for various clients, working together with an individual contact person, or a team. Solutions can vary from digital marketing to branding, design, and/or development at any stage the client is in.

2021 – 2023

Lead Engineer · i4energy

Building a high-end, holistic platform for the energy sector. Working alongside the product team and the software department to lead, research and architecture technical solutions to fulfill business needs. Lead and facilitate company-wide initiatives and accessibility initiatives such as agile, best practices and technical documentation.

2021 – 2021

Front-End Engineer · MAS S.A

Building and maintaining a high-end, holistic platform for the energy sector. Working alongside the product team and the software department to develop and maintain the product in accordance to business requirements. Collaborate with product managers and cross team engineers to transform business concepts into production realities.

2020 – 2021

Full-Stack Engineer · SLEED

Deliver high-quality, robust production code for a diverse array of clients, including Spitishop, e-professor, Thanopoulos and many more. Work alongside creative directors to facilitate development and build pixel perfect technical solutions to fulfill business requirements.

2017 – 2018

IT Designer · ST Consult ApS

Developing a web based consultancy portal for consultants and businesses, including advanced consultant and business matching, management and financial system. Working closely together with the CEO to conceptualize the idea and product until deployment.

2017 – 2017

Tutor · Business Academy SouthWest

Tutoring the Multimedia Design students in HTML5, CSS3 and SEO, leveraging my knowledge as a previous after-school homework and assignments helper.

2016 – 2016

Intern · Haug IT ApS

Developing web based solutions for various clients, including SME's in the on-premise science park.
